Did You Know? Early signs of heavy metal toxicity include fatigue, headache, indigestion, muscle pains, tremors, anemia, pallor, constipation, dizziness, poor coordination, a metallic taste in the mouth and an impaired ability to think or concentrate.

RECOMMENDED DOSAGE:

Take one (1) capsule daily with food. Dosage may be increased according to individual needs as directed by health care practitioner.

Available in bottles of 60 capsules.

NO FILLERS/NON-ALLERGENIC

Supports healthy, gentle detoxification*

Transformation's Professional Protocol Heavy Metal Defense* is specifically formulated with chlorella and unique ingredients to bind with heavy metals and help the body eliminate toxicity. Doctors are using Heavy Metal Defense for:

- **Environmental contamination from industry, pesticides, cigarette smoke, cosmetics, etc.**
- **Mercury overload**
- **A gentle alternative to more aggressive chelation therapies**

A few of the heavy metals we are most commonly exposed to are aluminum, arsenic, cadmium, lead and mercury. Other examples that we might not think of as heavy metals are chromium, copper, iron and zinc. Small amounts of many of these elements are necessary for health, while large amounts may cause poisoning. When the body is unable to detoxify and eliminate the excess metals, they accumulate in tissues and organs. Prevention is important in the defense against heavy metals for those who suspect they are at risk.

Note: Heavy Metal Defense is a new Transformation formula that replaces the former products HM DX and Heavy Metal Detox.
