complex carbohydrates*

Transformation's Professional Protocol Carbo provides GI support to reduce the formation of gas and improve tolerance of vegetables and legumes. Doctors are using TPP Carbo for:

- **Reduced intestinal cramping & the formation of gas**
- **Flatulence and colic-like symptoms**
- **Digestion of various carbohydrates found in grains, seeds, vegetables and legumes**
- **Epithelial cell vitality and strengthened peristalsis**
- **Improved tolerance of proteins and fats found in plant sources**

Carbo is essentially a "feel good" product designed to provide extra digestion after a meal high in carbohydrates. Carbo is good for those "trouble" foods like beans and hard to digest vegetables. Improperly digested plant-based compounds create various discomforts including the formation of gases and imbalances in the intestinal microflora. Their byproducts may promote various metabolic disorders. The comprehensive enzyme blends in Carbo enhance digestion and absorption, while the herbs in this natural formulation soothe and support the GI tract and the liver.
