

## ENDOMETRIOSIS

A benign disorder characterized by the presence of endometrial tissue (the tissue that lines the uterus) outside the uterine cavity where it becomes attached to reproductive organs, abdominal organs and/or various locations in the pelvic cavity. The main symptom is pain in the lower abdomen and pelvic region that worsens during menses. Abnormal or heavy bleeding as well as vaginal pain during sexual intercourse are characteristic symptoms of this condition. Endometriosis is also one of the most common causes of infertility. Proper diet and nutrient acquisition provide the building blocks needed to repair damaged tissue and create hormones in their proper balance. The goal of nutrition and enzyme therapy is to reduce inflammation and promote healthy tissue and hormonal balance.\*

- A digestive enzyme formula with meals will help ensure proper assimilation of all nutrients to support adequate production of hormones and healthy tissue repair.\*
- A nutritional support formula that uses “glandular” therapy to feed and fortify the targeted glands for improved function and health of the endocrine system as a whole.\*
- A protease formula between meals will help promote optimal blood flow and efficient delivery of hormones for the overall health of our reproductive system and to help manage inflammation.\*
- A nutritional support formula with antioxidants to promote the growth and repair of healthy tissues.\*
- A probiotic supplement further supports digestion and the immune system while maintaining a healthy gut environment.\*

---

TPP DIGEST	2 caps	with every meal or snack
MASTERZYME**	1 cap	3 x day with food
TPP PROTEASE	1 cap	4 x day between meals
TPP PROTEASE IFC	1 cap	4 x day between meals
TPP PROBIOTIC	1 cap	at bedtime

Transformation™ offers several formulas for the “sensitive” patient. If needed, you may substitute:

DIGESTZYME	3 caps	with every meal or snack
MASTERZYME**	1 cap	3 x day with food
PUREZYME	2 caps	4 x day between meals
TPP PROTEASE IFC	1 caps	4 x day between meals
PLANTADOPHILUS	3 caps	at bedtime

\*\*Testing or monitoring of hormone levels is advised with glandular / nutritional hormone therapies.

## ENDOMETRIOSIS

Additional support formulas you may want to consider for patients with Endometriosis:

---

TPP ADRENAL COMPLEX\*\*                      1 cap                      2 x day with food

- A glandular support formula containing enzymes, herbs, and glandulars further supports the endocrine and reproductive systems and proper regulation of hormones.\*

TPP LIVER SUPPORT                              1 cap                      1 x day with food

- The liver is responsible for filtering out excess and old hormones from our body. Endometriosis is an estrogen-dependent disease, as estrogen encourages endometriosis growth. This formula includes a synergistic formulation of enzymes, herbs, and nutrients that support healthy liver function.\*

GASTROZYME                                      2 caps                      with every meal

- Dysbiosis, leaky gut, and chronic inflammation appear to be common with endometriosis. This product is uniquely formulated with enzymes and herbs to support a healthy gastrointestinal tract as well as healing of the mucosal lining.\*

SUPER CELLZYME                                4 caps                      daily

- Deficiency in various vitamins and minerals can contribute to inflammation and other hormonal disturbances. This enzyme-delivered whole foods formula contains high quantities of riboflavin, calcium, zinc, magnesium, and vitamins A, B1, B3, and B12 which are important to maintaining energy levels and healthy muscles, organs, hair, and skin.\*

TPP EFA 1,200MG                                2 gelcaps                      daily with food

- For balancing hormones and reducing inflammation which can further effect hormone levels.\*

\*\*Testing or monitoring of hormone levels is advised with glandular / nutritional hormone therapies.
