Enzyme Therapy

PAIN MANAGEMENT

Pain and inflammation is the body's response when our cells are damaged. This can be caused by infections, injury, autoimmune disorders, or oxidative stress. The immediate response and repair is necessary and beneficial. It is when the response is chronic and uncontrolled that it becomes a problem. Enzyme therapy will help manage chronic pain and inflammation and help control the onset of degenerative diseases.*

- A digestive enzyme formula with meals will ensure proper assimilation to supply the cells with all the nutrients needed for function and repair as well as help minimize free radical damage that may trigger allergies or further pain and inflammation.*
- A protease formula between meals will promote optimal blood flow, support efficient detoxification, and help manage pain and inflammation.*
- A support formula of highly active proteolytic enzymes and antioxidants will help regulate pain and inflammation anywhere in the body.*
- A probiotic supplement further supports digestion and the immune system while maintaining a healthy gut environment.*

TPP DIGEST	2 caps	with every meal or snack
TPP PROTEASE	2 caps	3 x day between meals
TPP PROTEASE IFC	2 caps	3 x day between meals
TPP PROBIOTIC	1 cap	at bedtime

Transformation™ offers several formulas for the "sensitive" patient. If needed, you may substitute:

DIGESTZYME	3 caps	with every meal or snack
PUREZYME	2 caps	3 x day between meals
TPP PROTEASE IFC	2 caps	3 x day between meals
PLANTADOPHILUS	3 caps	at bedtime

Enzyme Therapy

PAIN MANAGEMENT

Additional support formulas you may want to consider for patients for Pain Management. Dosages are based on therapeutic recommendations and may be decreased for maintenance protocols.

TPP EFA 1200MG

2 gelcaps

daily with food

- Omega 3 fatty acids are beneficial due to their role in the reduction of pain and inflammation in various parts of the body.* These essential fatty acids are a good source of DHA and EPA omega 3's known for their many health benefits.

TPP JOINT HEALTH

1 cap

daily on an empty stomach

- Inflammation can cause joint swelling, pain, and stiffness. Individuals struggling with arthritis and other conditions that affect the joints will benefit greatly from this unique combination of whole food nutrients like glucosamine and collagen to balance fluid around the joint and further reduce inflammation.*
