## Natural support for systemic health\*

Homeostasis is when the body is in balance. It means feeling good the majority of the time—not just some of the time. It means being healthy, happy, and well. What can we do to support this awesome feeling? New technologies for isolating natural compounds can go a long way toward feeding this spirit.

- **Cannabidiol (CBD) isolate.** Safe and effective, CBD is believed to support the endogenous Endocannabinoid System (ECS), a key regulatory system that modulates several bio-physiological functions in the body.\*
- **Moringa.** This superfood plant has been praised for its health benefits for thousands of years.\* It has been found to help maintain blood sugar and cholesterol levels that are already within the normal range.\* Combined with protease and CBD, it supports a healthy diet and lifestyle.\*
- **Protease Blend.** These GI stable and functional, pH balanced proteolytic enzymes are included in the Protease-CBD formula to promote proper blood flow and help reduce the risk of free radicals.\*

**Health Benefits:** Transformation's Professional Protocol™ Protease-CBD was formulated to create a feeling of well-being. The ingredients in this formulation work synergistically to help calm the autonomic nervous system and support overall systemic health.\*
