† Daily Value not established

OTHER INGREDIENTS: VEGETABLE CAPSULE
(CELLULOSE, WATER)

Supports hormone balance for physical/emotional wellbeing*

Estrogen dominance is extremely common among both women and men in industrialized nations. A normal part of the aging process, it involves a strong influence from estrogen and/or increased estrogen activity due to the production of estrogen metabolites. Contributing factors shared by both women and men include stress, high-fat diet, smoking, environmental estrogens, and environmental toxicity.*

- **Support for Women.** A woman's menstrual cycle can sometimes involve heavy bleeding and occasional cramping. Supporting the reproductive system with the gentle and natural ingredients in Privita can promote healthy menstrual flow.*
- **Impact on Testosterone.** Estrogen dominance can impact the activity of aromatase enzymes, which increase the conversion of testosterone into estrogen. This is of particular significance to men and a good reason to consider natural support with Privita.*
- **Unique Ingredients.** The synergetic ingredients in the innovative Privita support formula have been carefully chosen to include DIM, Resveratrol, Quercetin, Green Tea, Pomegranate, Peppermint, Chamomile, Reishi Mushroom, and Astragalus.*

Health Benefits: Transformation's TranscendenceTM Privita formula helps balance estrogen levels to support a healthy reproductive system for both women and men.*

RECOMMENDED USAGE:

Take one (1) capsule, once daily or as directed by a health care practitioner.

Available in bottles of 60 capsules.
